HOME THEATER

4K UHD IMMERSIVE AV RECEIVERS

AudioControl's new Concert Series of AVRs is comprised of three models; the Concert XR-4, Concert XR-6 and Concert XR-8. All three models are packed with advanced cinema technologies, such as Dirac Live® room correction and all of the popular surround formats that bring every cinematic experience to life.

The Concert XR-6 and Concert XR-8 also add Auro-3D, one of the most sought after immersive formats available to consumers. Enthusiasts will also appreciate having four channels of user-configurable outputs, ideal for high-pass channels, additional subwoofers or height channels — whatever the room requires to optimise the movie experience (not available on the Concert XR-4).

The Concert Series AVRs feature a stunning industrial design, integrated web-based configuration, intuitive app-based control, Google Cast, Airplay 2, aptX Bluetooth and Wi-Fi streaming connectivity so that they can become the perfect entertainment hub for everyone in the home.
